Glycogen Hydrolysis Activity: Energy Storage and Release

Middle School (NGSS Aligned) Teacher Guide

Overview

This guide supports implementation of the Glycogen Hydrolysis Activity: Energy Storage and Release using the 5E instructional model.

Learning Objectives

- Students will observe how large molecules break into smaller pieces
- Students will identify patterns in chemical processes
- Students will explain how organisms store and use energy

Standards Alignment

- MS-LS1-7: Develop a model to describe how food molecules are rearranged through chemical reactions
- MS-PS1-2: Analyze and interpret data on properties before and after substances interact

Prerequisites

- Basic understanding that food provides energy
- · Knowledge that molecules can connect and separate
- Awareness that water is important for life

Time Estimate

45 minutes

Materials Needed

- Computer/tablet with internet access
- Student Activity Sheet
- Calculator (optional)

Teaching Tips by Phase

Phase 1: ENGAGE (5-10 minutes)

- Start with the phenomenon or problem presented
- Elicit student predictions and prior knowledge
- · Create cognitive dissonance if possible
- Build excitement for investigation

Phase 2: EXPLORE (15-20 minutes)

- Allow students to investigate with minimal guidance
- Circulate and ask probing questions
- Encourage systematic data collection
- Note common discoveries and difficulties

Phase 3: EXPLAIN (10-15 minutes)

- Have students share their findings first
- Build on their observations to introduce concepts
- Address misconceptions directly
- Connect to broader biological principles

Phase 4: ELABORATE (10 minutes)

- Apply knowledge to new scenarios
- Make real-world connections
- Encourage deeper investigation
- Support transfer of learning

Phase 5: EVALUATE (5-10 minutes)

- Use varied assessment strategies
- Focus on conceptual understanding
- Provide immediate feedback
- Plan follow-up based on results

Remember:

The goal is student discovery through guided inquiry. Resist the urge to explain concepts before students have explored them!
