

Light Harvester Activity: Photon Capture in Photosynthesis

Middle School (NGSS Aligned) Teacher Guide

Overview

This guide supports implementation of the Light Harvester Activity: Photon Capture in Photosynthesis using the 5E instructional model.

Learning Objectives

- Students will observe how plants use sunlight to make food
- Students will identify the inputs and outputs of photosynthesis
- Students will explain why plants are important for life on Earth

Standards Alignment

- **MS-LS1-6:** Construct explanations for the role of photosynthesis in cycling matter and energy
- **MS-LS2-3:** Develop models to describe cycling of matter and flow of energy among organisms

Prerequisites

- Basic understanding that plants need sunlight
- Knowledge that plants make their own food
- Awareness of oxygen and carbon dioxide

Time Estimate

45 minutes

Materials Needed

- Computer/tablet with internet access
- Student Activity Sheet
- Markers/colored pencils

Teaching Tips by Phase

Phase 1: ENGAGE (5-10 minutes)

- Start with the phenomenon or problem presented
- Elicit student predictions and prior knowledge
- Create cognitive dissonance if possible
- Build excitement for investigation

Phase 2: EXPLORE (15-20 minutes)

- Allow students to investigate with minimal guidance
- Circulate and ask probing questions
- Encourage systematic data collection
- Note common discoveries and difficulties

Phase 3: EXPLAIN (10-15 minutes)

- Have students share their findings first
- Build on their observations to introduce concepts
- Address misconceptions directly
- Connect to broader biological principles

Phase 4: ELABORATE (10 minutes)

- Apply knowledge to new scenarios
- Make real-world connections
- Encourage deeper investigation
- Support transfer of learning

Phase 5: EVALUATE (5-10 minutes)

- Use varied assessment strategies
- Focus on conceptual understanding
- Provide immediate feedback
- Plan follow-up based on results

Remember:

The goal is student discovery through guided inquiry. Resist the urge to explain concepts before students have explored them!
